

Something Good

Teenage Wrist

Such pride, mistaught
You did what you thought
You had to
I spent my life
Etching the same lines
That divide you

I wanna erase my mind
So I could be understood
I wanna come back to you with something good
I just wanted to love myself
I did the best I could
I wanna come back to you with something good

Don't look back now, the trail of dead
Inherited sickness
Proved to be fatal
Can't go back now, it's too late
I kept my worst cards
Under the table

I've been so blind
But the sun's in your eyes
Could try to cut the cyst out
Such pride and shame
I've been too afraid
To put my fucking fists down

I wanna erase my mind
So I could be understood
I wanna come back to you with something good
I just wanted to love myself
I did the best I could
I wanna come back to you with something good

Nurture the blame
Nature, just the same thing
Nurture the blame
Nature, just the same thing

I wanna erase my mind
So I could be understood
I wanna come back to you with something good
I just wanted to love myself
I did the best I could
I wanna come back to you with something good
I wanna come back to you with something good
