

# Come On Kids

Tegan and Sara

We were so high  
We thought we definitely died  
'Cause we were dead already, dying

Endless nights took on my whole life  
Or so I thought  
It turns out that all your friends  
They were just mean, dressed up

So come on kids, eat those pills  
You got your whole life to lose  
We've got so many friends  
That wear their feet too big for their shoes  
We've got cities to visit  
We've got trees we've yet to live in  
So get yourself on top of me  
Before I'm gone, gone, gone

We were so young  
I thought that acting old  
Would give me all your love  
Give me all you've got

So come on kids, eat those pills  
You got your whole life to lose  
And we've got so many friends  
That wear their feet too big for their shoes  
We've got cities to visit  
We've got trees we've yet to live in  
So get yourself on top of me  
Before I'm gone, gone, gone

And all night long on your front lawn  
You built me a neon village  
And you said, "Bring on new diseases  
If they're good for you, then they're good for me"  
Yeah, if it's good for you, then it's good for me  
If it's good for you, then it's good for me

So come on kids, eat those pills  
You got your whole life to lose  
And we've got so many friends  
That wear their feet too big for their shoes  
We've got cities to visit  
We've got trees we've yet to live in  
So get yourself on top of me  
Before I'm gone, gone, gone

And we've got so many friends  
That wear their feet too big for their shoes  
We've got so many friends  
That wear their feet too big for their shoes  
We've got so many friends  
That wear their feet too big for their shoes  
We've got so many friends  
That wear their feet too big for their shoes
