

Broken Stars

Teitur

You break my fall to cushion my soul
You fix the parts I can not fix alone
I crash right in, into your universe
You catch my drift without saying a word

And only you and I know it's like time just began
Only you and I know, only we understand

Layin' under this mighty sky
Wondering how we got here tonight
Gravity has played its part
Baby look at where we are
It's like I loved you light years ago
From the sky above to the ground below
It's hard to fathom we've come this far
That we're all made up of broken stars
Broken stars, broken stars
Broken stars, broken stars

The puzzle's done, all the pieces they fit
When you stand back you can see all of it
And someday when we are ashes and dust
Time and space will remember us

And only you and I know, we are where we should be
Only you and I know, it was always you and me

Layin' under this mighty sky
Wondering how we got here tonight
Gravity has played its part
Baby look at where we are
It's like I loved you light years ago
From the sky above to the ground below
It's hard to fathom we've come this far
That we're all made up of broken stars
Broken stars, broken stars
Broken stars, broken stars
