

Breathe in, let's free your mind and breathe in  
Heaven, it seems we're both in Heaven  
Nature gave a helping hand  
To the people of this land  
Who desired to share their love  
Of the wonders of this world  
How many winters have to go by  
Before your green replaces white?  
And how many raindrops have to fall down  
Turning to blue all that is brown?

Viridian, your warmest energy  
Viridian, will shine like emerald  
Viridian, I see it in your eyes  
Viridian, whoa-oh

Heaven, I swear this could be Heaven  
Seven, the days to build this Eden  
But in two days, maybe less  
It could be a world of nothingness  
All the colors will turn grey  
No more words, we should pray  
There's so much love here, just look around  
Starting to grow down from the ground  
Carried by wind we'll make our dance  
Until we'll meet again your glance

Viridian, your warmest energy  
Viridian, will shine like emerald  
Viridian, I see it in your eyes  
Viridian, whoa-oh

Viridian, your warmest energy  
Viridian, will shine like emerald  
Viridian, I see it in your eyes  
Viridian, whoa-oh

Viridian

Viridian, your warmest energy  
Viridian, will shine like emerald  
Viridian, I see it in your eyes  
Viridian, whoa-oh

Viridian, your warmest energy  
Viridian, will shine like emerald  
Viridian, I see it in your eyes  
Viridian, whoa-oh

Viridian
