

Step Down

Temples

I never could understand
What animal makes a man
I try my very best to be free
Up above
You're caught up between the bars
You always would drive too fast
Maybe it's time for you to step down
Ah

I never could seem to reach
High up on your shoulder seat
I try so hard to make you believe
Honestly
Speed up when you start to stall
You'll never get far at all
Sing the day, we pray, you finally step down
Ah

Down
You better step down
Down
You better step down
When worlds collide
You run and hide

I never could really tell
Part ways with your sense of self
Everyone seems to be so in love
Not enough
Your nature will serve you first
Ride out on a painted horse
Time is up for now, you better step down
Ah

Down
You better step down
Down
You better step down
Down
You better step down
Down
You better step down
When worlds collide
You run and hide
