

Little Star

TEMPOREX

Every single little thing I do
Doesn't end like how I want it to
It becomes a little star in my eye

Pestering precipitation and my
Perception is imposter to
How you see me inside of your mind

Elevate me when you're open to
Feeling like you really ought to
Bend and fold into a different size

I'll make sure you're okay
Fall in love just the same
Roses in my yard sing
Bouquets of your love stay alive

Something tells me that I'm all alone
No one to talk to nowhere to go
Feel like nobody fond of me
Honestly
You could disagree but it's not hard to see

Roll me out wear me thin
Light my breath
Is it in
Make me see what you are
