

# Open Letter

TEMPOREX

Wish I didn't care as much as I did  
I've been this way since I was a little fucking kid  
Picking sunflowers in a field with my friend Sid  
He wasn't real but I used to wish he did exist  
This isn't a sob story I'm just fucking sad  
Imaginary girlfriends are the only one's I've had  
Everything I've started has always ended bad  
Losing 10 pounds is never fucking rad

In love with someone from a different state  
Even if I was there we still wouldn't date  
I'm not mad, I don't hate you  
But truthfully I'd give the world just to fucking date you

Days will always be the same  
Don't you say my name  
'Cause you know I'll answer  
Always and forever (Always and forever, Always and forever)

Days will always be the same  
Don't you say my name  
'Cause you know I'll answer  
Always and forever (Always and forever, Always and forever)

I hope that girls like me for this one  
So maybe then I wouldn't fuckin miss one  
No one wants to come near me (ever)  
All I fuckin want is just to feel better  
Just to feel better (why can't I feel better?)

All I want is just to feel better  
All I want is just to feel better  
If you really want her go get her  
'Cause she'll go away forever
