

# The Key

Tems

The beat is ready and I ride it  
When I come around they excited  
They all want a key to the garden  
So I put it up and I light it, light it  
Tell me how you like it  
Get me on the wheel, Imma drive it  
But they wanna raise up the mileage

Well I don't like to turn my back  
And so I work and give back  
Me I just try to dey my lane  
I got the gang behind now  
Listen when they call, they call my name  
I found the voice within me  
No man can curse what God has made

So I can beat your pain  
When the dark is closing in  
See they want to love me now  
When they tried to take me down  
We'll be flying off the ground  
When the world is going out  
When the earth is falling in

This is the mind, this is the light  
This is the time, this is the way  
I see the dream coming before me  
I've been the one, don't have to say it  
This is the vibe, don't need to fake it  
Seeing the world, living beyond it  
This is the key, so I can save you

Well I don't like to turn my back  
So I work and give back  
Me I just try to dey my lane  
Got the gang behind now  
Listen when they call, they call my name  
I found the voice within me  
No man can curse what God has made

So let me beat your pain  
When the dark is closing in  
See they want to love you now  
When they tried to take you down  
We'll be flying off the ground  
When the world is going out  
When the earth is falling in

Yeah yeah  
Their heat is getting cold  
Their eyes are slowly closing  
Their chains they cannot hold me  
Under the open sky  
They're looking for a way  
But I will keep you safe  
Yeah yeah oh yeah
