

Missing You

Ten Tonnes

Oh-oh, don't wanna play it all back
My cameos didn't mean no favours
Oh-oh, feels like a couple years
They're only days but they got between us

I've been scrolling back and forth
But you never let me down
No, you never chewed me out

I'm trying but I can't let it go
I've been missing you
I've been missing you
The only place that I call home
I've been missing you
I've been missing you

My dreams are getting awful strange
I hold a heart, I think it's my own
Dig in my heels again
Like quicksand holding it all

I've been scrolling back and forth
But you never let me down
No, you never chewed me out, oh-oh

I'm trying but I can't let it go
I've been missing you
I've been missing you
The only place that I call home
I've been missing you
I've been missing you

I'm trying but I can't let it go
I've been missing you
I've been missing you
