

# Blame

TENDER

(Speed signal processing)

No, I don't even know anymore  
If I'm sick or I found a cure  
Got a fever and a cold sweat  
Tried to sleep with the sheets wet

You did this to me  
When I tried to intervene  
Tried to make you stop  
Before you went and hurt somebody else  
You can blame yourself  
And gather dust upon the shelf  
You thought you were anyone's  
Girl, you ain't having me

Tried to take my love, oh  
I won't give it up, won't give it up for you  
You tried to take my love, oh  
I won't give it up, won't give it up, no, not for you

But you stripped me down  
Wore me to the bone  
I am hollow now  
Nowhere else to go  
Running to your open arms  
Like you tempt me from the street  
I am praying to prodigal  
With nothing else to eat

You did this to me  
When I tried to intervene  
Tried to make you stop  
Before you went and hurt somebody else  
You can blame yourself  
And gather dust upon the shelf  
You thought you were anyone's  
Girl, you ain't having me

Tried to take my love, oh  
I won't give it up, won't give it up for you  
You tried to take my love, oh  
I won't give it up, won't give it up, no, not for you
