

Control

TENDER

You, I'll go wherever you want me to
I'll do whatever you tell me to
So lost in this world
Forgot you're just another girl
You control me yeah
You control me

With every little sense of my being
And every fucking thought that I'm thinking
Down to every tooth in my mouth and every single word that comes out
You say I got a chip on my shoulder
And everyday I feel older
I feel a sadness to the bone
Does your blood still run cold?

Well go ahead and let me know how I get out
I'm so done with, I'm so done with you
Let me know how to get out
Imma run away from this

I don't wanna lose all my friends but girl I don't blame them
I haven't been all the same since you tried to claim them
I don't wanna throw you away or fight for the same thing
You can have me
You control me

With every little sense of my being
And every fucking thought that I'm thinking
Down to every tooth in my mouth and every single word that comes out
You say I got a chip on my shoulder
And everyday I feel older
I feel a sadness to the bone
Does your blood still run cold?

Well go ahead and let me know how I get out
I'm so done with, I'm so done with you
Let me know how to get out
Imma run away from this
