

Lower

TENDER

I don't care about no money
You don't have to work so hard
Trying to make a fuss it's funny
How far is far?
You don't need to feed no family
We're just in it for the fun
Gotta get a rush when you have me
What's done is done

Lower than I thought we'd go
Multicoloured the truth I show
Why's the guilt spread so slow?
Get it out of me
I am happy with the choice you made
Cut your hair and paint your face
Take your secrets to the grave
Can't get it out of me

Do you belong to the cold night air?
Feeling safe in the clothes you wear
Missing out but we never go
Lay your face against the snow
Does it taste good when it hits your throat?
Punctured blood in an empty note
Coming down with nothing to show
Wasted days spent alone

Say it's all 'cause you're lonely
But I see you every day
Getting all thin and bony
Wasting away
You really think that no one will miss you
You really think that no one will care
You really think that nobody's listening
That life isn't fair

Lower than I thought we'd go
Multicoloured the truth I show
Why's the guilt spread so slow?
Get it out of me
I am happy with the choice you made
Cut your hair and paint your face
Take your secrets to the grave
Can't get it out of me

Do you belong to the cold night air?
Feeling safe in the clothes you wear
Missing out but we never go
Lay your face against the snow
Does it taste good when it hits your throat?
Punctured blood in an empty note
Coming down with nothing to show
Wasted days spent alone

Do you belong to the cold night air?
Feeling safe in the clothes you wear
Missing out but we never go

Lay your face against the snow
Does it taste good when it hits your throat?
Punctured blood in an empty note
Coming down with nothing to show
Wasted days spent alone
