

red lights

TENDER

They say I hide it well
I can tell I'm heading down the spiral
Fake laugh like no one else
Save face try to force a smile

Been here too many times
Got the keys rehearsed the lines
Going nowhere, just wanna drive
Cruising through red lights

I've been feeling so down on everything you do
Everything you do yeah
I've been feeling so down on everything you do
Everything you do yeah
I've been feeling so down on everything you do
Everything you do yeah
I've been feeling so down on everything you do
Cruising through red lights
I've been feeling so down on everything you do
Everything you do yeah
I've been feeling so down on everything you do
Everything you do yeah

Won't you pick up your phone
I been looking for hideouts losing my mind now
Wait for for someone to stop me
Baby it's not me

'Cause I just can't control myself
Is this a call for help
Been losing the appetite
Spending my days and nights
Just cruising through red lights

I've been feeling so down on everything you do
Everything you do yeah
I've been feeling so down on everything you do
Cruising through red lights
I've been feeling so down on everything you do
Everything you do yeah
I've been feeling so down on everything you do
Cruising through red lights

I've been feeling so down on everything you do
Everything you do yeah
I've been feeling so down on everything you do
Cruising through red lights
I've been feeling so down on everything you do
Everything you do yeah
I've been feeling so down on everything you do
Cruising through red lights

I've been feeling so down on everything you do
Everything you do yeah
I've been feeling so down on everything you do
Cruising through red lights
I've been feeling so down on everything you do

Everything you do yeah
I've been feeling so down on everything you do
Cruising through red lights

I've been feeling so down on everything you do
Everything you do yeah
I've been feeling so down on everything you do
Everything you do yeah
