

By the skin of your teeth
It came right down to the wire
All's not lost yet
Second wind knocked right out of me
Don't they say fight fire with fire
Give damn what you believe
I don't think you're

Telling me everything
I hope I'm wrong
Doing it all again
We feel so lost
You'd rather be with your friends
Just go somewhere
Anywhere but here with me

Made a fool out of me
Guess I'll just let it slide
Happened more than once
Happens all the time
Can't we fucking agree
You say I don't have a spine
Make your own decision baby
Make you're own mind up

You wanna do this on your own
That's fine by me
Say your better off alone
I guess we'll see
Already set the tone
Think you'd rather be
Anywhere but here with me

Anywhere but...
