

Sleep beneath the stars  
Honey, I have all I need right in front of me  
Waiting in the car  
Burning all my money on the dashboard for the record

Don't need it where I'm going  
And I can't admit, no way of knowing  
Is it cold outside? No way of knowing  
Will you be my guide?

I'm gonna need you tonight  
Tell me everything is alright  
You wouldn't do it but I just might  
So, show me how you made the vow  
I'm gonna need you tonight  
Walking miles in the moonlight  
Got myself into the wrong  
So, show me where to make amends

Watching Summer fall  
Baby, make my heart beat, liking what I see  
Meet me in the bar  
Drinking like it's almost Friday, we're doing my way

Don't need it where I'm going  
And I can't admit, no way of knowing  
Is it cold outside? No way of knowing  
Will you be my guide?

I'm gonna need you tonight  
Tell me everything is alright  
You wouldn't do it but I just might  
So, show me how you made the vow  
I'm gonna need you tonight  
Walking miles in the moonlight  
Got myself into the wrong  
So, show me where to make amends
