

where we go

TENDER

Hope the earth beneath my feet
Cracks and opens and swallows me
Write our names in film of dust
Hope they all remember us

For reasons beyond our callous words
Wished we'd ended on better terms
Oh baby you didn't show me where it hurt
You didn't show me where it hurt

'Cause maybe I could help
I would've tried
Wanted to try for you
Any pain you might've felt
I would've taken too

Tell me where we go from here
Tell me where we go from here
Tell me where we go from here
Tell me where we go from here

There's a sadness to it all
Feel the dampness to the walls
The smell of candles going out
Blood and tears haunt the house

Miss the feeling the freshness of the air
Something's missing but no one really cares
How you're broken beyond all repair
But maybe I do

Maybe I could help
I would've tried
Wanted to try for you
Any pain you might've felt
I would've taken too

Tell me where we go from here
Tell me where we go from here
Tell me where we go from here
Tell me where we go from here

Tell me where we go from here (I could be anything for you)
Tell me where we go from here (I will go anywhere you do)
Tell me where we go from here (I could be anything for you)
Tell me where we go from here

Tell me where we go from here
Tell me where we go from here
Tell me where we go from here
Tell me where we go
