

Take Heart

Tenth Avenue North

Waking up to a heart full of worry
Breath tight inside of your lungs
You wonder how long you can carry
The weight before you just give up

I know your world feels so out of control
But I promised I would never let you go

Take heart take heart
When everything feels like it's falling apart
Take heart take heart
Wherever you've been and wherever you are
If there's life inside your chest you're not finished yet
Take heart

This world is a world full of trouble
But my heart is still full of grace
The hurt only lasts for a little while
One day you'll see everything change

Take heart take heart
When everything feels like it's falling apart
Take heart take heart
Wherever you've been and wherever you are
If there's life inside your chest you're not finished yet
Take heart take heart

When you're overwhelmed
I have overcome
When you're overwhelmed
I have overcome
When you're overwhelmed
I have overcome
When you're overwhelmed
I have overcome

Take heart take heart
When everything feels like it's falling apart
Take heart take heart
Wherever you've been and wherever you are
If there's life inside your chest you're not finished yet
Take heart take heart
Take heart take heart
Take heart
