

All The Same

Tep No

Tell me that you love me
Tell me that your looks won't fade away
You say that you need me
I say that I need you all the same
All the same

You say that you want me
Baby please don't look, don't fade away
Sometimes beauty's ugly
Keep loathing, inside out we're all the same
All the same
All the same
All the same

Baby won't you leave it all again
When you fall to wake
Baby won't you leave it all again
When you fall to wake
When you fall to wake

I say don't you worry
I love it when we fight, don't fade away
Pull the trigger on me
Crank it up [?], don't you wait

Baby won't you leave it all again
When you fall to wake
Baby won't you leave it all again
When you fall to wake
When you fall to wake
When you fall to wake
Baby won't you leave it all again

Tell me that you love me
Tell me that your looks won't fade away
Pull the trigger on me
If I say that I need you all the same

(All alone I thought you were) I need you all the same
(All alone I thought you were) I need you all the same
(All alone I thought you were) I need you all the same
(All alone I thought you were) I need you all the same
(All alone I thought you were) I need you all the same
