

## Promises

Tep No

I just want to dive into you  
You can swallow me whole if you want to  
As we slow dance in the dark  
Let me kiss you babe while we play the part

You know, it's all the things that you say  
It's all the things that make my heart start beating  
It's all the things that you say  
It's all the promises that keeps me breathing  
It's all the things that make my heart start beating  
It's all the things that make my heart start beating

Let me the sun from your view  
I'll feed you all the lies if you want me to  
I can lift you up like a new divide  
Come here and feel this heart of mine

You know, it's all the things that you say  
It's all the things that make my heart start beating  
It's all the things that you say  
It's all the promises that keeps me breathing  
It's all the things that make my heart start beating  
It's all the things that make my heart start beating

It's all the things that you say  
It's all the things that make my heart start beating  
It's all the things that you say  
It's all the promises that keeps me breathing  
It's all the things that make my heart start beating  
It's all the things that make my heart start
