

# Waiting For Us

Tep No

I don't need a thing  
Coast to coast  
I'd sail away with you

Ride into a dream  
Moonlit eyes  
Float in the deepest blue

So when the world begins to break  
And all the pieces  
Don't fit no more  
Hold on  
Cause we just need a little faith  
A change in season  
There's always a shore

Waiting for us  
Waiting for us  
Waiting for us  
Waiting for us

Only get to see  
Where the lines  
Are when the tide is low

If anything is clear  
Like the sun  
Your warmth, it overflows

So when the world begins to break  
And all the pieces  
Don't fit no more  
Hold on  
Cause we just need a little faith  
A change in season  
There's always a shore

Waiting for us  
Waiting for us  
Waiting for us  
Waiting for us
