## ...and I Need To Be With Someone Tonight

## **Terence Trent D'Arby**

Shine on your light Lead me to your home

Lower your sights
Put away your comb

Though black babies are starving And cows fed for the carving

All I know is I'm lonely
And I need to be with someone tonight

Lift up your chin Let me see your eyes

Words are not my yen
My tongue is often tied

Though apartheid's a greater issue I long to hear "I miss you"

All I know is I'm lonely
And I need to be with someone tonight

'Till men stop being intimidated By women who have made it

All I know is I'm lonely
And I need to be with someone tonight
