

Real Magic

Terrace Martin

Just take your time
Count your blessings yeah
Just lay right here for a second yeah
It's a free world, let me get lost up in it

Just take your time
Count your blessings
Just lay right here for a second
It's a free world, let me get lost up in it

All of the love that you got inside
Was making a world all this while
And all of the light that you left behind
Is way up somewhere in the clouds coming back around

Higher than you ever been, ever seen
Real talk this the love you put in everything
Let it breathe, let it all feel alright
Different world we wake up to every night
Put it in the music on your downtime
Real magic happens every once in a while
Put it in your music on your downtime
Real magic happens every once in a while

Just take your time
Count your blessings yeah
Just lay right here for a second yeah
It's a free world, let me get lost up in it

Just take your time
Count your blessings
Just lay right here for a second
It's a free world, let me get lost up in it

And all of the people oh that you know
Are all on their way to the show
And all of the light that you left behind
Is way up somewhere in the clouds coming back around

Higher than you ever been, ever seen
Real talk this the love you put in everything
Let it breathe, let it all feel alright
Different world we wake up to every night
Put it in the music on your downtime
Real magic happens every once in a while
Put it in your music on your downtime
Real magic happens every once in a while

Real magic happens every once in a while

Just take your time
Count your blessings yeah
Just lay right here for a second yeah
It's a free world, let me get lost up in it

Just take your time
Count your blessings

Just lay right here for a second
It's a free world, let me get lost up in it

Real magic happens every once in a while
