

Right Where You Left Me

Terri Clark

Like the Colorado sky, this heart mine runs wide open
And you can't be still you keep your wheels in motion
So that kiss goodbye, ain't no surprise
When your taillights disappear

I'll be here right where you left me
I remember you and I know you won't forget me
Like a leaving song you keep movin' on
And if you think about me out there, yeah I'll be here

Coffee in a cup, bags in the truck, engine's running
And I wouldn't take it back, baby what we had was something
But some things don't last
And that sun is setting fast
Just put us in the rearview mirror

And I'll be here right where you left me
I remember you and I know you won't forget me
Like a leaving song you keep movin' on
And if you think about me out there, yeah
I'll be here, where you left me

That kiss goodbye, ain't no surprise
When your taillights disappear
I'll be here, right where you left me
I remember you and I know you won't forget me
Like a leaving song you keep movin' on

Baby good luck out there
I'll be here, right where you left me
Where you left me
