

Light It Up

Terrian

I must admit some of the things You do
They leave me confused
What am I to do?
But who am I to even question You
God, I was such a fool
You've always brought me through

Send that fire, light that match
Put that spotlight on my path
If You don't I just might crash
Honestly it's hard to see it

'Cause If You want it I want it
I ain't leaving You for nothing
When You call I come running
Light it up, come shine that light
When You say it I'll believe it
What You got is what I'm needing
Yeah I'll follow where You're leading

Light it up, come shine that light
Light it up, come shine that light
Light it up, come shine that light
Light it up, light it up

All of my drama that I've held on to
It's keeping me from You
Help me trust in You

Send that fire, light that match
Put that spotlight on my path
If You don't I just might crash
Honestly it's hard to see it

'Cause If You want it I want it
I ain't leaving You for nothing
When You call I come running
Light it up, come shine that light
When You say it I'll believe it
What You got is what I'm needing
Yeah I'll follow where You're leading

Light it up, come shine that light
Light it up, come shine that light
Light it up, come shine that light
Light it up, light it up
Light it up, won't Ya shine Your light
Lord Jesus, come shine that light
We want You to shine that light
Light it up, light it up, oh-oh

Aiming, falling
Reaching for my calling
I need saving, I need something
Craving, I'm all in
Jesus, heal us
Keep us, free us

I need Jesus, I need Jesus
Only Jesus

Light it up, come shine that light
Light it up, come shine that light
Light it up, come shine that light
Light it up, come shine that light
Light it up, light it up

'Cause If You want it I want it
I ain't leaving You for nothing
When You call I come running
Light it up, come shine that light
When You say it I'll believe it
What You got is what I'm needing
Yeah I'll follow where You're leading

Light it up, come shine that light
Light it up, come shine that light
Light it up, come shine that light
Light it up, light it up
Light it up, come shine that light
Light it up, come shine that light
Light it up, come shine that light
Light it up, light it up

Light it up, come shine that light
Light it up, come shine that light
Light it up, come shine that light
Light it up, light it up
Light it up, come shine that light
Light it up, come shine that light
Light it up, come shine that light
Light it up, light it up
