Lip gloss  
I feel like 2016  
Jake Gyllenhaal you can't quit me  
Up on the mountain you kiss me  
But down in the city you diss me

Viral  
On top of the world then I spiral  
I'm doing fine I might cry though  
Swallow my tears and I smile  
Cause we're only here for a while

So whatcha want  
Whatcha really really want from me?  
Just keep it real don't sub me  
Jealousy is ugly I know you really love me  
Whatcha want  
Whatcha really really want from me?

So whatcha want  
Whatcha really really want from me?  
Just keep it real don't sub me  
Jealousy is ugly I know you really love me  
Whatcha want  
Whatcha really really want from me?

Idol  
Worship your fav like recital  
Wait in a line when they're open  
Cast them away when they're broken  
I'm hoping I'm hoping  
And wishing  
I got a new song will you listen?  
Cause I need to beg for attention  
Just to get dragged in my mentions  
I think I need some affection

So whatcha want  
Whatcha really really want from me?  
Just keep it real don't sub me  
Jealousy is ugly I know you really love me  
Whatcha want  
Whatcha really really want from me?

So whatcha want  
Whatcha really really want from me?  
Just keep it real don't sub me  
Jealousy is ugly I know you really love me  
Whatcha want  
Whatcha really really want from me?
