

The New Beginning

Terror

You talk about the meaning, the message
You don't get it!
You came, you left us
So just forget us!
Nothing's held sacred
But because our money's green
These frauds come running back
And shit on our scene!

You just wanna be someone
You want the world to see
You just gotta be something
But when you're dead you stay dead to me

The message
You don't get it!
You came, you left us
So just forget us!
A disgrace to yourself
And all you claim to be
You wore your welcome out
It's just a shame that more don't see

You just wanna be someone
You want the world to see
You just gotta be something
But when you're dead you stay dead to me

Don't try to act like you're still a part of something
We know you're only here to fill your empty pockets
Don't try to preach to me about the old days
Because I was there, and I'm still here

You talk about the music, the message
You don't get it
You talk about the music, the message
You don't get it
You just wanna be something
You just wanna be someone
