

## Sympathy

Tesla

If you could understand my pain  
Then all my cries would never be in vain  
If you would recognize my footprints and bloodstains  
Then everything would change  
You can say it all in a million ways without a word

Have some mercy on me  
A little sympathy  
Are you listening?  
Can you hear my screams?  
Does your heart still beat  
While you watch me freeze in your cold disease  
Can you hear my screams?

Tell me now could you even comprehend  
All these messages I'm trying to send  
Show me how all this misery could end  
Turn it all around and be my friend  
You can say it all in a million ways without a word
