

## Storm

TESLENKO

I walked through the darkness  
My heart consumed by shades of blue  
But your voice, like starlight  
Revealed my path and led to you  
No one can crush what I'm feeling  
No one will tell me I've lost  
All I need is your love to keep me move on

Your love like a storm  
It crashes it burns  
It heals then it turns  
I feel reborn

In the fire of our passion, we ignite the darkest night  
With your hand, I feel the magic, turning shadows into the light  
Baby if I feel you let me know  
What is in your heart, maybe you show  
If you wanna dance just hold me tight tonight

Your love like a storm  
It crashes it burns  
It heals then it turns  
I feel reborn

Your love like a storm  
It crashes it burns  
It heals then it turns  
Your love like a storm

Your love like a storm  
It crashes it burns  
It heals then it turns  
I feel reborn

Your love like a storm  
It crashes it burns  
It heals then it turns  
Your love like a storm
