

You're hiding in the backroom, dancing's on the rise  
Feel the cold wind blow and it's coming from all sides  
Barefoot in the back streets, shadows on the floor  
Take out Little Annie 'cause she's heading out the door  
Everybody knows only you can stop her now  
Maybe that's 'cause you know how

Moonstar  
You're my moonstar  
In the sky  
Looking down on me  
You're my moonstar  
That's what you are

Taking me up Old Street, ya checkin' out the view  
Taking me all over, yeah, you know what to do  
Taking out the unknown, yeah, take it from me  
So take it off the internet, yeah, take it all for free  
Fakin' it all night, now everyone's said their piece  
It's time to all fall to your knees

Moonstar  
You're my moonstar  
In the sky  
Looking down on me  
You're my moonstar  
That's what you are

Moonstar  
You're my moonstar  
In the sky  
Looking down on me  
You're my moonstar  
That's what you are

Moonstar  
You're my moonstar  
In the sky  
Looking down on me  
You're my moonstar  
That's what you are
