TGT

Been feeling like it ain't enough for you Don't tell me that you let go of our flings Or maybe there's another guy Maybe I just ain't your type So much for forever and a day

But I know what you're liking very well I know why you came around And know what kept you here But if this goes too far, gets out of hand I know just what I gotta do It's what I've always did

I make you happy I make you happy

Now look me in the eyes and say you love me You can't even pretend that you still care Is it even worth me fighting? Tell me, are you even trying? 'Cause I feel like nothing's there

But I know what you're liking very well I know why you came around And know what kept you here But if this goes too far, gets out of hand I know just what I gotta do It's what I've always did

I make you happy I make you happy

Is it really worth me fighting? 'Cause I feel like no one cares

But I know what you're liking very well I know why you came around And know what kept you here But if this goes too far, gets out of hand I know just what I gotta do It's what I've always did

I make you happy I make you happy

I make you happy I make you happy
