

A Million Bots

That Handsome Devil

Sex, religion, nepotism
Devil in the television
Law and order, special victims
Tribalistic nihilism

Shhh, the government is listenin'
Trackin' your position
And the pesticide, it tickled
And it's itchin' and it's blisterin'

Pills to make your dick big
Fills to make your lips thick
Just like all the chicks dig
Air raid, blitzkrieg

I want a million bots
To tell me that I'm hot
What to buy and where to shop
Advise me in my stocks

I want a million bots
I wanna feel like I'm being watched

You want a life without suffering
You want a life without shit
So you just want another
So you just wanna quit

The preservatives are murderous
[?] burning the witch
And the nomination
For the best performance is

I don't care, I've never heard of it
It's curdling your nerves will twitch
Commercialism turned the kids
To servants of the current hits

Pills to make your dick big
Fills to make your lips thick
Just like all the chicks, dig
Air raid, blitzkrieg

I want a million bots
To tell me that I'm hot
What to buy and where to shop
Advise me in my stocks

I want a million bots
I wanna feel like I'm being watched

There's no shame in fame
It's not even your real name
There's no shame in fame
It's not even your real name
There's no shame in fame
It's not even your real name

There's no shame in fame
It's not even your real name
