

## Kill The Rat

## That Handsome Devil

Kill the rat, eat the cow, feed the cat  
Kill the rat, eat the cow, feed the cat  
Kill the rat, eat the cow, feed the cat  
Kill the rat, eat the cow, feed the cat

My spit is stickin' full of garbage  
It hangs in puddles like drowned worms  
The morning after storms

Your perspective is subjective  
So you think it's all connected  
They charge you for the poison  
Then they charge you for the cure

Kill the rat, eat the cow, feed the cat  
Kill the rat, eat the cow, feed the cat  
Kill the rat, eat the cow, feed the cat  
Kill the rat, eat the cow, feed the cat

Man you can run, and you can hide  
But the call is coming from inside  
You live your life along the line  
Or argue on until we die

And all the worlds and all the songs  
And all the times you sang along  
All the symbols have been drawn  
But the meaning's gone

And on your smile, and on your heart  
Were not so lonely, lonely, lonely lonely  
And on the way we've come apart  
You think you know, you don't know, no, no  
Your brains, the numbers, and the letters  
We are alone in this together  
Forgetting ourselves with each other  
We are alone in this together

Time will only wait for so long  
And all the things you made will be gone

It's closer now  
I'm older now  
But it just keeps on goin' round

It knocks me over, slows me down  
But I can't let it hold me down  
Well, with all the words, and all the songs  
And all the times you sang it wrong  
All the halos and the horns  
But the meaning's gone

And all your smiles, and all your hearts  
Were not so lonely, lonely, lonely lonely  
And on the way we've come apart  
You think you know, you don't know, you know, you know  
Your brains, the numbers and the letters

We are alone in this together  
Forgetting ourselves with each other  
We are alone in this together

Time will only wait for so long  
And all the things you made will be gone

(Open the throttle! All aboard, the promised land! Pillars of smoke by day,  
pillars of fire by night! Machines to make machines, production to expand pr  
oduction! Enough for tens, thousands, millions, millions!)
