

Right Where You Left Me

The Academic

Tell me where to start and I will fix your broken heart
We always said we'd stay in touch but that plan fell apart
There's no more time to wait and I won't make the same mistakes
I'll be right where you left me
I'll be right where you left me

Found out you're hurting
It made me want to call you
There's something burning
It's triggered by calling out your name
Your name out loud

Tell me where to start and I will fix your broken heart
We always said we'd stay in touch but that plan fell apart
There's no more time to wait and I won't make the same mistakes
I'll be right where you left me
I'll be right where you left me
I'll be right where you left me

Lately I can't sleep
I'm dreaming of re-connection
The seasons are changing
But I'll still be calling out your name
Your name out loud
Are we the same?
Or am I going insane?

I never stopped thinking
I never stopped believing
I never stopped trying
It ruined all my weekends
We always had a deal that one day we would get together
And one way or another it was gonna be forever

Tell me where to start and I will fix your broken heart
We always said we'd stay in touch but that plan fell apart
There's no more time to wait and I won't make the same mistakes
I'll be right where you left me
I'll be right where you left me

I'll be right where you left me
I'll be right where you left me
I'll be right where you left me
I'll be right where you left me
