

This could be everything
This could be all that you wanted
Nothing more, nothing less
It could be burning bright

Why do you worry, is there something wrong?
Have you been crying to your favourite song?
Everything's blurring now
We could be every night

Are you ready to go?
Are you ready to leave this place behind?
Are you ready to go?
I think I superlike you
Superlike, superlike, superlike
I think I superlike you

In a week I think that we'll be happy
We could roll the dice and try to make it happen
I can wait, I can wait
We could be burning bright

So why are you trying?
When you're going outside of the city
For a lonely town
Feels like the first time
We could be every night

Are you ready to go?
Are you ready to leave this place behind?
Are you ready to go?
I think I superlike you
Superlike, superlike, superlike
I think I superlike you

You're shining like a broken star
You play it cool and you know you are
You're a broken star, you know you are to me

Are you ready to go?
Are you ready to leave this place behind?
Are you ready to go?
I think I superlike you
Superlike, superlike, superlike
I think I superlike you
