

Welcome to the Future

The Afters

Welcome to the future
Welcome to the here and now
Welcome to the future
What you know, forget about
Some might call it magic
But I see supernatural
Welcome to the future
Welcome to the future
(Welcome to the future)

Close your eyes, take a step
Breathe it out, let it in
Lose yourself, only just to find you
Holding on, let it go
Way beyond, chemical
Feeling that, I get when I run through

Billions of stars, up in the sky
The more that we know, and wonder why
Gravity calls. Plan tonight
How far can we go, and what will we find

Welcome to the future
Welcome to the here and now
Welcome to the future
What you know, forget about
Some might call it magic
But I see supernatural
Welcome to the future
Welcome to the future
(Welcome to the future)

Coming down, waking up
Shaking off, all the dust
There's no way, I could ever go back
Like a dream, colorful
Everything, beautiful
Stretching out as far as I can see it

Billions of stars, up in the sky
The more that we know, and wonder why
Gravity calls. Plan tonight
How far can we go, and what will we find

Welcome to the future
Welcome to the here and now
Welcome to the future
What you know, forget about
Some might call it magic
But I see supernatural
Welcome to the future
Welcome to the future

(The) Future, the future, the future is here
The future, the future is already here
The future, the future, the future is here
The future, the future is already here

The future, the future, the future is here
The future, the future is already here
The future, the future, the future is here
The future, the future is already here

(Welcome to the future)
Welcome to the future. (Welcome to the future)
Welcome to the future. (Welcome to the future)
Some might call it magic
But I see supernatural
Welcome to the future
Welcome to the future
(Welcome to the future)
