

When You're with Me

The Afters

Waiting, I was waiting
So many long and lonely nights
Searching, I was searching
For something I could never find
But I knew in that moment
When your eyes met up with mine
All my wait was over
And that's when you changed my life

The sun shines brighter when you are here
My heart beats louder and time just disappears
Everything is how it should be
When you're with me

Dreamers, we are dreaming
Of all the days that lie ahead
Nothing, there is nothing
That can take all that we have
Hold you, I will hold you
Through the better and the worse
Promise, oh I promise
And I'm not just saying words

The sun shines brighter when you are here
My heart beats louder and time just disappears
Everything is how it should be
And I can't stop counting my lucky stars
I'll always want to be where you are
Everything is how it should be
When you're with me

I will always love you
I will always love you

The sun shines brighter when you are here
My heart beats louder and time just disappears
Everything is how it should be
And I can't stop counting my lucky stars
I'll always want to be where you are
Everything is how it should be
When you're with me

Dreamers, we are dreaming
Of all the days that lie ahead
With you, I'll be with you
Until the very end
