

## Take a Bow

### The Agonist

Powerless, depressed  
I try to conceal all the wreckage inside  
They are denied the basic rights  
Gand delivered to all mankind

My patience tried  
Forgiveness died  
My arms are tied, let go  
All of the scars, built up the walls  
Life drifting far below  
Instinct can't save you now  
Man stand up, take a bow  
The sun always hides behind the clouds  
Always

Tell me - When did we lose our way  
Why is the whole world our prey  
Inhumane is the trend nowadays  
How much more can they pay  
In the end

My patience tried  
Forgiveness died  
My arms are tied, let go  
All of the scars, built up the walls  
Life drifting far below  
Instinct can't save you now  
Man stand up, take a bow  
The sun always hides behind the clouds  
Always

How blind we've been to let destructive forces fly  
Deaf ears hear them, closed hands feel them  
Empathy begins when all this ends  
Here it ends

End all innocent lives right now  
We bring nothing and claim the crown  
End all innocent lives right now  
We bring nothing and claim the crown
