

# Let The River Run Its Course

## The Alarm

The future  
No past is going to stop us blowing down this road a piece  
Why we come too far, too far to turn back now  
We can just throw it all away when something good goes wrong, oh no  
Nothing has been written which says which way we have to go  
I'm not looking for commitment written in stone  
No everlasting promise no no

Let the river  
Let the river run  
Let the water  
Let the water fall  
Flow down off the mountain  
Into the sea  
Let the river run, run its course

We've stood this ground too long there's miles to make up  
Oh it's way past the time we found out if we're truly good enough  
There's no truth like the truth you dare to let yourself see  
Better face it now there is nothing to fear  
Everything to gain right in here

Let the river  
Let the river run  
Let the water  
Let the water fall  
Flow down off the mountain  
Into the sea  
Let the river run  
Let the river run  
Run its course

Let the river  
Let the river run  
Let the water  
Let the water fall  
Flow down off the mountain  
Into the sea  
Let the river run

Let the river run  
Let the water fall

Let the river run  
Let the water fall
