## **Can't Take It**

## The All-american Rejects

You speak to me I know this will be temporary You ask to leave, But I can tell you that I've had enough

I can't take it This welcome is gone and I've waited long enough to make it And if you're so strong You might as well just do it alone And I'll watch you go

Step up to me I know that you've got something buried I'll set you free You set conditions, but I've had enough

I can't take it This welcome is gone and I've waited long enough to make it And if you're so strong You might as well just do it alone And I'll watch you go

Come back home, won't you come back home? You step in line; you got a lot to prove It comes and goes Yeah, it comes and goes A step in time, yeah it's a lot to move I know this will be temporary I know this will be temporary I know this will be, but I've had enough

I can't take it This welcome is gone and I've waited long enough to make it And if you're so strong You might as well just do it alone And I'll watch you go

I can't take it This welcome is gone and I've waited long enough to make it And if you're so strong You might as well just do it alone And I'll watch you go
