Dark Visions

The Amazons

There's nothing wrong but I'll leave the light on
A smoking gun and a pill to swallow
I wanna know where the daylight goes
I wanna know how it gets so cold

There's no dream that could stand the tide
And there's no place here for me to hide
Ain't got a chance against the dying light
I stay awake to fight the stings and bites

Like a shadow crawling out the dark
Take a swipe at my beating heart
Feels like the end, but it's just the start

All my demons keep me overthinking
Of dark visions, of dark visions
And the beasts, they come in the dead of night
Feeding all my fears, brings them back to life
Dark visions, dark visions
They'll been calling at my door

Send him in, send the revelator
I got some thoughts that I need erasing
How many times do I have to pray?
How many sins can you wash away?

Like a shadow crawling out the dark
Get your hands off my beating heart
Feels like the end, but it's just the start

All my demons keep me overthinking
Of dark visions, of dark visions
And the beasts, they come in the dead of night
Feeding all my fears, brings them back to life
Dark visions, dark visions
They'll be calling at my door
Always howling out for more

All my demons keep me overthinking
Of dark visions, of dark visions
And the beasts, they come in the dead of night
Feeding all my fears, brings them back to life
Dark visions, dark visions
They'll be calling at my door
They'll be howling out for more
