

XRAY

The Anix

Backseat ride, your touch is skeptical
It's alright I'm still electrical
We can't see through our skin, illegible
Third degree burns aren't forgettable

(I) I watch you pass and let you go
It seemed right, don't let me know
I'm not the same, you'll never know
Be gone tonight, won't let you know

We can drive into the night again
Watch your eyes turn as we hydroplane
I won't cry for you
Help me fight for you (And on, and on, and on)

I watch you pass and let you go
It seemed right, don't let me know
I'm not the same, you'll never know
Be gone tonight, won't let you know

I won't die for you
Help me see through you (And on, and on, and on)
(I'm not the same, you'll never know)

I watch you pass and let you go
It seemed right, don't let me know
I'm not the same, you'll never know
Be gone tonight, won't let you know

I watch you come (I won't die)
And let you go (For you)
It seemed right (And on, and on, and on)
Don't let me know
I'm not the same (Help me see)
You'll never know (Through you)
Be gone tonight (And on, and on, and on)
Won't let you know
