

What's My Name? My Name Is... What!? What!?

The Anniversary

I like to crash and burn my tiny body breaks - I hardly say a word
Teenage girls are so distractive (distractive) - it makes them so attractive
Change the temperature to 60 - tonight girl you better make it sexy
She lived the movie life - so we acted how it might feel to fall in love
And we lived on beyond the stars - look at how high they are - how high are you?
And I never pray at night and when the joke's not going right I sit alone

There's one thing that is gold
It's the one thing you have stolen
And you've gone and turned it black
Your stories always end like that

There's one thing that is gold
It's the one thing you have stolen
And you've gone and turned it black
Your stories always end like that
