

Come Follow Me

The Answer

I got a bright sun lightning my way
I've a woman and she's making my day
There's a time when you open up a page
of your life and you're smiling

Those lines that cross your face
They tell me a story
Tell me you got the time

I'd a killer it was under my skin
It disappeared so that I'd begin
Searching my soul, digging up the earth
that had fallen through my fingers

Those lines right across your face
They're telling me a story, have you still got the time?
Have you got the time?

Come follow me
When your head's so heavy with the weight of the day
Come follow me
I can steal you while I'm on my way
Come follow me
It's a new day
So don't swallow me down, no don't swallow me down today

See the man with his head in the sand
He's got a while flag and a gun in his hand
It's a cold wind creeping up your back and I know that
you despise it

Those lines that are crossing your face
They're telling me a story, tell me you got the time
I think you got it now

Come follow me
When your head's so heavy with the weight of the day
Come follow me
I'll steal you while i'm on my way
Come follow me
