

Lights Are Down

The Answer

You know I could never surrender
This night isn't over just yet
I search for another pretender
Caught up in a barbed wire net

Are you watching me
With no authority

All the lights are down
And there's only you around
When the lights are down
That's when there's no one around
There's no one around
When the lights are down
That's when there's no one around

I stand alone in the silence
But I know the smell of your breath
One glance, like a face on a tombstone
One touch is enough to digest

Your electricity
Is burning holes in me

All the lights are down
And there's only you around
No one around
When the lights are down
That's when there's no one around
There's no one around
When the lights are down
That's when there's no one around

Show me somewhere I can find my place
Show me somewhere
Show me somewhere I can find my place
Show me
When there's no one else around

There's no one around, when the lights are down
That's when there's no one around
There's no one around
When the lights are down
That's when there's no one around

Ooh
