

Scream a Louder Love

The Answer

I watch my girl hit the bubble tonight
She said, "I've got a temper like dynamite"
But there's a world outside, I know she don't wanna fight
So we're hiding away, hiding away
She said, "I've had enough of that foolin' around
I'm gonna try so hard to bust out of this town
But the past, so heavy, keeps dragging me down
Got my head in a noose, head in a noose"

So if you gonna scream, scream a louder love
If you wanna scream, scream a louder love right now

It's tit for tat checking under your car
She said, "Why can't the people be the people they are?"
They built a 10 foot wall to keep the neighbours apart
They're not going away, going away
We're counterfeit victims on a tribal scale
So maybe this place is just born to fail
Yeah we could change it if we wanted but we're all in jail
We're locked in a cell, locked in a cell

So if you wanna scream, scream a louder love
If you wanna scream, scream a louder love

Come and join this fight
We'll live tonight and make it feel alright
And we'll scream a louder love
Scream louder...

So tell me if I scream a little louder
So tell me if I scream a little louder
I need to know, I'm not alone
Let's get together, we can break the code

If you gonna scream, scream a louder love
If you wanna scream, scream a louder love

Come and join this fight
We'll live tonight and make it feel alright
And we'll scream a louder love
(If you wanna scream)
Come and join this fight
(Scream a louder love)
We'll live tonight and make it feel alright
(Scream)
And we'll scream a louder love
(Scream a louder love)
Scream a louder love
Scream louder, yeah
Scream louder!
