

Green Machine

The Apples In Stereo

What happened to me? Wake me up from this dream -
I want my Green Machine, don't wanna keep myself clean,
Where can I go? I feel I'm running low -
a cinema show to forget what I know, to forget...

- Saturdays & Superfriends -
- These are things that I can still remember -
- These are things I thought would last forever...

No money to spend, just my best friends -
wish I could turn a bend, be with them again
on my Green Machine - that wasn't a dream -
some things still seem important to me, still important...
- These are things that I can still remember

Summertime, the world should shine,
shine for everyone.
Days on end - time to spend
underneath the sun -
When you're old time's bought & sold,
Time's yours when you're young -
And summer coems for everyone
underneath the sun...

Something inside feels like butterflies,
I want to run & hide or take off and ride
my Green Machine, that wasn't a dream -
Some things still seem important to me, so important...

-These are things I thought would last forever...
