

## Onto Something

The Apples In Stereo

I like it when you feel good but if your mad well maybe I'll get mad, it's ok I like you anyway.

I like it when you talk but if you scream and if you make a scene it ok, I like you anyway.

Looks like we've started something here well my head is spinning, were onto something, were onto something.

Looks like were getting somewhere here or maybe we're already there, were onto something, were onto something.

I like the hair that grows out of your head and if you dye it red that's ok, I'll like you anyway.

I like it when you sleep but if you snore and roll me onto the floor, but its ok I like you anyway.

Looks like we've started something here well my head is spinning, were onto something, were onto something.

Looks like were getting somewhere here or maybe were already there, were onto something, were onto something.

Looks like we've started something here well my head is spinning, were onto something, were onto something.

Looks like were getting somewhere here or maybe were already there, were onto something, were onto something.

Looks like we've started something here well my head is spinning, were onto something, were onto something.

Looks like were getting somewhere here or maybe were already there, were onto something, were onto something,  
were onto something,  
were onto something.

Girl - Something

Guy - I dunno though.
