

## Spring: Wake

### The Arcadian Wild

Wake up, sleepyhead  
I pulled you out from the flowerbed  
My breath fills your lungs  
I'll give this garden to my favorite son

You are prince of all you see  
I'd like us to care for it together  
You just look so much like me  
My affections for you have no measure

You are clothed in brilliance  
Naked as you came  
Because you bear my likeness  
Blessed be your name

Walk with me, my child  
We'll give names to all creatures wild  
I'll strengthen your hands  
Bless and be blessed by this land

You are prince of all you see  
I'd like us to care for it together  
You just look so much like me  
My affections for you have no measure

You are my begotten  
The one I love  
Today I am your father  
Our story's just begun
