

Settle Down

The Astronomers

Take a look around, everyone's different than the way I left them

Going to parties just to feel like the rest of them, woah-oh
But who am I to say?

That all of those things that I said, I didn't mean them
Going to parties just to hold on to the old friends, yeah okay

Because we messed up just a little
To find out that I need a little help
So our heart can finally settle down, down, down, down
We held on just a little
Bit too long to know that it'll
Break down bars and finally settle down, down, down, down

Take a look around
Everyone's hanging on the edge of a good life
Living to party with their friends on the westside, oh yeah
Why'd I even pay?
Why did I show up to the house in the first place?
I was just fighting all the things that I might hate, yeah okay

Because we messed up just a little
To find out that I need a little help
So our heart can finally settle down, down, down, down
We held on just a little
Bit too long to know that it'll
Break down bars and finally settle down, down, down, down
Yeah

(Settle down)

Settle down

(Settle down)

Settle down

Help us so our heart can settle down, down, down

(Settle down)

Settle down

(Settle down)

Settle down

Help us so our heart can settle down, down, down, down

Yeah

I need to settle down, yeah

I need to settle down

Help us so we can settle down
