

Skywalking

The Astronomers

Sometimes I feel euphoric, is it pre-historic love?
In a time of Mayan ruins, how did we get through it?
Is that curtain stained?
Or am I right side brained?
Do you know the time?

We can live like northern lights, up so high we're skywalking
Just a trip with Jedi knights on millennium falcon
Cause this just feels right
Oh, this just feels right

The way we feel tonight, I can't ignore it
Skywalk around my mind, put my thoughts into orbit
I could fly, have laser eyes, you'd still be my kryptonite
Through dark nights, I'll survive if I'm with you

We can live like northern lights, up so high we're skywalking
Just a trip with Jedi knights on millennium falcon
Cause this just feels right
Oh, this just feels right, yeah

We can live like northern lights, up so high we're skywalking
Just a trip with Jedi knights on millennium falcon
We can live like northern lights, up so high we're skywalking
Just a trip with Jedi knights on millennium falcon
Cause this just feels right
Yeah, this just feels right
This just feels right
